Here you will find support for teaching and studying BTEC Nationals in Construction and the Built Environment. These vocational qualifications help level 3 students develop the practical knowledge, skills and understanding they need to prepare for their chosen career.

## **BTEC Nationals | Construction and the Built Environment**

The construction of origami models is sometimes shown as crease patterns. The major question about such crease patterns is whether a given crease pattern can be folded to a flat model, and if so, how to fold them; this is an NP-complete problem. Related problems when the creases are orthogonal are called map folding problems. There are three mathematical rules for producing flat-foldable ...

## **Mathematics of paper folding - Wikipedia**

In mathematics, real analysis is the branch of mathematical analysis that studies the behavior of real numbers, sequences and series of real numbers, and real-valued functions. Some particular properties of real-valued sequences and functions that real analysis studies include convergence, limits, continuity, smoothness, differentiability and integrability.
