66 Study Guide for An Introduction to Chemistry Section Goals and Introductions Section 6.1 An Introduction to Oxidation-Reduction Reactions Goals To describe what oxidation and reduction mean to the chemist. To describe chemical reactions for which electrons are transferred (oxidation-reduction reactions). To describe oxidizing agents and reducing agents.

Chapter 6 Oxidation-Reduction Reactions - Mark Bishop

Etymology "Redox" is a portmanteau of the words "reduction" and "oxidation". The word oxidation originally implied reaction with oxygen to form an oxide, since dioxygen (O₂ (g)) was historically the first recognized oxidizing agent. Later, the term was expanded to encompass oxygen-like substances that accomplished parallel chemical reactions.

Electrochemistry is the branch of physical chemistry that studies the relationship between electricity, as a measurable and quantitative phenomenon, and identifiable chemical change, with either electricity considered an outcome of a particular chemical change or vice versa. These reactions involve electric charges moving between electrodes and an electrolyte (or ionic species in a solution).

The Chemistry Subject Test is your chance to show colleges your understanding of the main principles of chemistry and your ability to use these concepts to solve specific problems. If you plan to major in engineering or a science, taking this test is a good way to showcase your skills. There are 59 SAT Chemistry practice tests.

An Introduction to Chemistry by Mark Bishop. There are two versions of this current textbook, both containing the same information but organized differently: the "Chemistry-first" version begins with actual "chemistry" that is, chemical equations and reactions.
