Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

1. Introduction. Understanding the kinetic mechanisms of cement hydration intersects both academic and practical interests. From an academic standpoint, the chemical and microstructural phenomena that characterize cement hydration are quite complex and interdependent, making it difficult to resolve the individual mechanisms or the parameters that determine their rates.

Un moyen dâ€™obtenir une pyridine dissymétrique est de faire réagir une 3-aminoanone avec un composé 1,3-dicarbonyl. La 3-aminoanone attaque une des fonctions carbonyle du composé 1,3-dicarbonyl pour ensuite donner une imine qui cyclise la molécule en réagissant avec lâ€™autre carbonyle. Au cours de la réaction, deux molécules dâ€™eau sont éliminées [16].
