Beta blockers (beta-adrenergic blocking agents) are a class of drugs prescribed to treat and manage a variety of heart conditions as well as non-FDA approved uses to treat other conditions. Common side effects of these drugs are nausea, vomiting, diarrhea, and abdominal cramps. There are more serious side effects of this class of drugs. Talk with your doctor or pharmacist with any questions.

Paediatric history taking differs significantly from a standard history for a number of reasons, the first being that the patient may not be able to communicate, so a collateral history is often essential. In addition, there are a number of extra topics you™ need to cover, such as immunisation and developmental history.
