Unmanned Aircraft Systems (UAS)

The aircraft design process is the engineering design process by which aircraft are designed. These depend on many factors such as customer and manufacturer demand, safety protocols, physical and economic constraints etc. For some types of aircraft the design process is regulated by national airworthiness authorities.

Aircraft design process - Wikipedia

Aerodynamics, from Greek *ἀήρ* (air) + *δυναμική* (dynamics), is the study of the motion of air, particularly its interaction with a solid object, such as an airplane wing. It is a sub-field of fluid dynamics and gas dynamics, and many aspects of aerodynamics theory are common to these fields. The term aerodynamics is often used synonymously with gas dynamics, the difference being ...

Performance Properties Since the primary function of aviation turbine fuel (jet fuel) is to power an aircraft, energy content and combustion quality are key fuel performance properties. Other significant performance properties are stability, lubricity, viscosity, volatility, non-corrosivity, and cleanliness. Besides providing a source of energy, fuel is also used as hydraulic fluid in engine ...
