World-systems theory (also known as world-systems analysis or the world-systems perspective) is a multidisciplinary, macro-scale approach to world history and social change which emphasizes the world-system (and not nation states) as the primary (but not exclusive) unit of social analysis. "World-system" refers to the inter-regional and transnational division of labor, which divides the world ...

Modern portfolio theory (MPT), or mean-variance analysis, is a mathematical framework for assembling a portfolio of assets such that the expected return is maximized for a given level of risk. It is a formalization and extension of diversification in investing, the idea that owning different kinds of financial assets is less risky than owning only one type.

I saw a patient last week who was self referred. He had been seeing a DC/ND for a variety of symptoms that turned out to be asthma. Not that the DC/ND made that diagnosis. His DC/ND diagnosed him with an infection, based on live blood analysis, and offered the patient a colonic detox as a cure. My ...
