Naïve set theory is any of several theories of sets used in the discussion of the foundations of mathematics. Unlike axiomatic set theories, which are defined using formal logic, naïve set theory is defined informally, in natural language. 2 Similarity graphs Given a set of data points x_1, \dots, x_n and some notion of similarity $s_{ij} \geq 0$ between all pairs of data points x_i and x_j , the intuitive goal of clustering is to divide the data points into several groups such that points in the same group are similar and points in different groups are dissimilar to each other.
